### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Regarding claim 1 on line 11, "the inclination angle" has been changed to – an inclination angle –

Regarding claim 7, at the end of line 3 "of the" has been eliminated.

### **DETAILED ACTION**

#### ***Allowable Subject Matter***

2. Claims 1-29 and 31-48 are allowed.

Regarding claim 1, prior art such as Toyoda (US 6,371,623 B1) teaches a light guide (Figure 3, item 2) that guides light emitted from a point primary light source (4) and which has a light incident end surface and a light outputting surface, an elongated lens forming surface (6) including a plurality of elongated concave/convex structures.

Prior art however fails to teach or make obvious such a light guide wherein the elongated concave/convex structures extend in a direction of the directivity of light and wherein a distribution of the micro regions having the inclination angle between 20 degrees and 50 degrees is more than 10% over all micro regions in the vicinity of the

primary light source, such that the inclination angle is formed by a tangent to each micro region and is defined in an absolute value.
